

# CREATIVE ARTS EXAMPLES

This document aims to exemplify two creative arts projects that already took place. It will feature a short explanation of the two projects and pictures.

## Letter Exchange between students

In a letter exchange two students, one from Rwanda and one from Rheinland-Palatinate, form a tandem. The students exchange with each other about a topic chosen by their teacher. The students could write texts, draw pictures or use recyclable materials to communicate about the given topic. Once the students have received their letters, the cycle starts again with a new topic.

## Murals painted by Students

In this project started by Jumelage students are allowed to paint a wall of their school. The motives and colors used are completely their decision. Jumelage only provides the painting materials and ensures the safety of the students during the painting process. Professional artists are sometimes present to mix the colors and to support.
